# Fire Safety Training

Automated QA report · 16 October 2026

**SIGN-OFF BLOCKED**

1 showstopper must be resolved before sign-off.

Showstoppers are issues that should never reach a learner.

| READINESS | SHOWSTOPPERS | MAJOR | MINOR | DISMISSED |
|---|---|---|---|---|
| 45/100 | 1 | 6 | 3 | 0 |

| STANDARD | AUTHORED IN | SLIDES | FILE |
|---|---|---|---|
| SCORM 1.2 | Articulate Storyline | 4 | Fire-Safety-Training.zip |

# Findings

In severity order, worst first.

SHOWSTOPPER

### Course never sets a completion status

LMS tracking

No reference to lesson_status or completion_status was found, so the LMS has nothing to mark the learner complete with.

**Fix** Set a completion trigger in the publish settings (e.g. complete when all slides viewed, or on quiz pass).

---

MAJOR

### Image has no alternative text

Slide 1 of 4 · Welcome to Fire Safety · Accessibility

`image "hero_img" (320×240)`

Screen readers announce nothing for this image. Alt text is a baseline requirement in most corporate accessibility policies.

**Fix** Add alt text in the Size & Position panel, or mark the object as decorative.

---

MAJOR

### Image has no alternative text

Slide 2 of 4 · Untitled Slide · Accessibility

`image "map_img" (360×240)`

Screen readers announce nothing for this image. Alt text is a baseline requirement in most corporate accessibility policies.

**Fix** Add alt text in the Size & Position panel, or mark the object as decorative.

---

MAJOR

### Possible misspelling: "Downlod"

story.html · Copy & proofing

```
You have have completed the course. Downlod your certificate from the training port
```

Did you mean "Download"?

**Fix** Correct it, or add the term to this course's allow-list if it is intentional.

---

MAJOR

### Repeated word: "have have"

story.html · Copy & proofing

```
You [have have] completed the course. Downlod your certifica…
```

---

MAJOR

### Course never terminates the LMS session

LMS tracking

No LMSFinish/Terminate call was found. Sessions can be left open, which shows up as inflated time-spent figures and occasional "already in progress" locks.

---

MAJOR

### Image is 8.9 MB

assets/hero.png · Media & performance

Images this large delay the slide from painting and inflate the package.

**Fix** Export at the size it is actually displayed and compress (JPG quality ~80, or WebP). This is a PNG: unless it needs transparency, re-exporting as JPG typically cuts it by 80%.

---

MINOR

### Slide title is still the default ("Untitled Slide")

Slide 2 of 4 · Untitled Slide · Functionality

Default titles show up in the course menu and in LMS reporting.

MINOR

### Object is cut off by the slide edge

Slide 2 of 4 · Untitled Slide · Layout & formatting

`text "cropped_note"`

It extends 170px past the right edge. The learner sees it clipped.

MINOR

### Object sits entirely off the slide

Slide 4 of 4 · Summary · Layout & formatting

`text "offstage" at 1400,300`

It is parked outside the visible area. Harmless if deliberate (objects animated in from off-screen), but often forgotten content.

NOTE

### Player navigation is restricted

Functionality

The player is set to restrict or lock navigation, so Next only becomes active once each slide's timeline completes. That is a deliberate setting, but it is the single most common source of "the Next button is broken" support tickets — worth confirming it is intended for this audience.
